EXECUTIVE SUMMARY

Motivated Electronics and Communication Engineering student with a strong foundation in full-stack development, seeking an entry-level Software Developer role. Proficient in front-end technologies including HTML, CSS, and JavaScript, as well as back-end development with Java and Python, and database management with SQL. Equipped with solid knowledge of Data Structures and Algorithms, with the ability to build efficient, scalable web applications. A fast learner with a problem-solving mindset, eager to contribute to innovative tech teams and grow in a dynamic software development environment.

EDUCATION

KIT - KalaighnarKarunandhi Institute of Technology - Coimbatore, India B.E Electronics and Communication Engineering, Pre-Final year	2023 – 2027 Current CGPA: 8.05/10.0
KRP-matric Hr.sec School – Salem, India HSC in Bio-Math group	PERCENTAGE : 7.4/10.0
Vidhya Vikas matric Hr.sec School – Salem, India SSLC	PERCENTAGE : 10.0 / 10.0 All Pass.

PROJECTS

AI-Based PLC Code Generator for IEC 61131-3

- Developed an AI-powered application to generate PLC programs from simple English instructions using Groq AI API.
- Supported multiple IEC 61131-3 programming languages used in industrial automation systems.
- Planned future integration of a dedicated AI model and simulation system for automatic logic verification.

AI-Based Cross-Language Code Translator

- Built an AI-based application to convert programs between multiple programming languages without changing the core logic.
- Integrated AI APIs for syntax-aware code translation and automated language conversion workflows.
- Simplified code migration and improved development efficiency through automated program conversion.

Smart Disaster Shelter Management System Using LoRa

- Built a disaster shelter monitoring system using LoRa communication to transmit data without internet connectivity.
- Monitored shelter details such as population count, food availability, temperature, and humidity using sensor nodes.
- Developed a Wi-Fi gateway and web application to provide shelter information to affected people during network outages.

Dynamic Bulk Mailing Automation System

- Created a bulk mailing application using SMTP protocol for automated email sending through personal mail accounts.
- Designed customizable email templates with support for logos, colors, layouts, and social media links.
- Improved email campaign automation by allowing complete mail design customization instead of basic text editing.

TECHNICAL SKILLS			CERTIFICATIONS & COURSES	
HTML, CSS	JavaScript	Java	INFOSYS – Database Systems Part 1 & Part 2	2025
Git	GitHub	SQL	NPTEL – Professional English	2024
Python	DSA	OOP	NXTWAVE - Front-end Development	2025
			NXTWAVE - Python programming	2025
			NXTWAVE - JavaScript	2025
